

Abhin Anilkumar

DevOps Engineer | AWS | Kubernetes | Docker | Linux | Terraform | Jenkins | Git

✉ Email: abhinachu23@gmail.com | ☎ Phone: 7736083121 | Location : Kerala

Summary

As a DevOps Engineer at Shopalyst Technologies, my expertise lies in leveraging my BCA degree from the University of Kerala to drive excellence in computer applications and network programming. Committed to continuous learning, I am dedicated to expanding my skill set and staying updated with emerging technologies. I am deeply motivated to excel as a proficient DevOps Engineer, seeking to make substantial contributions to industry innovation and success..

Skills

Operating system	Linux (Ubuntu, RHEL)
Cloud Platforms	AWS,GCP, Azure (Basic)
Scripting Languages	Bash
CI/CD Pipelines	Jenkins CI/CD. Argo CD, GitHub Actions
Monitoring and Logging	Prometheus, Grafana, ELK/EFK stack
Infrastructure as Code	Terraform
Container Management	Docker, Kubernetes
Version Control	Git

Professional Experience

Devops Engineer - Shopalyst Technologies

2024 - Present

Kerala, India

- Upgraded Node.js across 75 AWS-hosted servers using shell scripts and Ansible, followed by seamless application redeployment with zero downtime
- Deployed and configured the EFK (Elasticsearch, Fluentd, Kibana) stack for centralized logging across distributed systems, enabling real-time log aggregation, visualization, and faster incident resolution.
- Designed and implemented CI/CD pipelines using Jenkins to deploy applications across multiple environments on AWS SSM-managed servers, streamlining release processes and improving operational efficiency.

- Supported Linux system administration on Ubuntu and RHEL environments, automating routine tasks with Bash scripting
- Managed Git-based version control workflows, supporting team collaboration and code release processes
- Monitored system health and performance using Prometheus and Grafana, setting up dashboards and alerts to proactively detect issues

DevOps Engineer - [Urolime Technologies](#)

2022 -2024

Kerala, India

- Provisioned Amazon EKS with Terraform, automating cluster, networking, and IAM configurations for secure and efficient Kubernetes operations.
- Deployed GKE using Terraform, Helm Charts for Node.js apps, and optimized CI/CD workflows with Google Cloud tools and Jenkins for cross-cloud flexibility.
- Migrated legacy on-premise apps to a clustered environment, enhancing scalability and integrating monitoring for improved reliability and visibility.
- Established a robust DR setup, replacing traditional infrastructure to ensure seamless failover and uninterrupted operations during outages.
- Configured a Kubernetes cluster using kubeadm in an air-gapped environment, ensuring secure, offline deployment and cluster initialization without external internet access.

Certifications/Badges

- | | |
|-----------------------------------|------|
| • AWS Knowledge: Architecting | 2025 |
| • AWS Knowledge: Cloud Essentials | 2025 |
| • AWS Knowledge: Amazon EKS | 2024 |

Courses

- Aws solution Architect Associate
- CCNA
- Python Basics

Strengths

- Strong eagerness to learn and grow in technical domains
- Excellent communication and collaboration skills
- Fast learner with the ability to adapt quickly
- Strong organizational and time management abilities

Education

Bachelor of Computer Application (BCA) - [University of Kerala](#)

2017 - 2020

Kerala, India
